

Selective APR.

Adjustable Pallet Racking (APR), commonly known as Selective Racking, is the most versatile and cost effective storage system for wholesale, factory and retail warehousing environments. There are several types of APR configurations, providing different solutions to your key logistic challenges: space, retrieval efficiency and cost. The bottom line is your competitiveness and profitability.

Selective APR.

Single Selective APR is the most popular and economical form of pallet racking, best suited for easy access to a large number of different product SKU's. Aisle widths range from 2500mm upwards. Standard beam lengths are 1370mm for single entry bays and 2600mm or 2700mm for double entry bays. Walkie Straddle stackers require 2700mm beams with straddles on edge.

Benefits of Selective APR:

- ❑ 100% selectivity and accessibility of goods
- ❑ Good stock rotation
- ❑ Fast picking rate
- ❑ Storage up to in excess of 10m high
- ❑ Can be used with the largest range of materials handling equipment
- ❑ Low floor utilisation of 33% can be solved by the Very Narrow Aisle option

Double-Deep APR.

Double-Deep APR is the most cost effective solution that provides high floor area utilisation in facilities that have large quantities of the same SKU. Aisle widths range from 3000-3500mm. Standard beam lengths are 1370mm for single pallet bays and 2600mm or 2700mm for double pallet bays. It can increase storage capacity by 17% over a Selective APR configuration. It is an efficient design to increase storage density at a relatively low capital cost. Stock access: First-In-Last-Out.

Benefits of Double-Deep APR:

- ❑ Fast picking rate
- ❑ 50% floor area utilisation
- ❑ Storage up to in excess of 10m high
- ❑ Best handling equipment – Double-Deep Pantograph Reach Truck

Very Narrow Aisle APR.

Ideal for large warehouses that require fast pick rates and easy access to a large number of different product SKU's. Aisle widths range from 1500-2300mm. Standard beam lengths are 1370mm for single entry bays and 2600mm or 2700mm for double entry bays. This highly efficient floor space solution requires specialist handling equipment and a wire or rail guidance system.

Benefits of VNA APR:

- ❑ 100% selective product accessibility
- ❑ Best combination of floor space and stock access
- ❑ Best handling equipment – Turret Truck, Articulated Forklift, Stock Picker, Stacker Crane

ISS ProRack / ProFork Smart Rent

- ❑ Just 24, fixed, monthly direct debit repayments
- ❑ Convenient, manageable, cash-flow friendly
- ❑ Own a re-saleable asset with minimal impact on your finances!

Complete Productivity Solution.

ISS ProRack Smart Storage Systems.

Palletised Storage:

- ☑ Selective APR
- ☑ Double-Deep Racking
- ☑ Drive-In Drive-Through

Non-palletised Storage Systems:

- ☑ Cantilever Racking Systems
- ☑ Longspan Shelving Systems
- ☑ Modular Multi-tier Systems

ISS ProRack Smart Service.

- ☑ Responsive, Personalised Service
- ☑ Safety Auditing
- ☑ **Free** CAD Design
- ☑ Installation
- ☑ Maintenance and Repair
- ☑ Relocations and Trade-in

ISS ProFork Smart Handling Equipment.

Product storage is about efficiency and cost. We provide an extensive range of equipment to suit your needs:

- ☑ Counterbalance LPG
- ☑ Counterbalance Electric
- ☑ Walkie Stackers
- ☑ Power Pallet Trucks
- ☑ Reach Trucks
- ☑ Order Pickers
- ☑ Turret Trucks
- ☑ Hand Pallet Trucks

ISS ProFork Smart Service.

Your operation's performance is only as good as the reliability of your equipment and safety of your staff:

- ☑ Preventative Maintenance Servicing
- ☑ Short Term Hire
- ☑ New Equipment Sales
- ☑ Fast, Efficient Breakdowns Response
- ☑ Long Term Hire
- ☑ Used Equipment Sales

ISS ProRack/ProFork Smart Finance.

ISS Smart Finance options improve your cash flow:

- ☑ Smart Rent
- ☑ Purchase
- ☑ Long or Short Term Hire
- ☑ Service and Maintenance Plan

ISS ProRack/ProFork Smart Rent.

At ISS we know how important cash flow is to any business. With this in mind, we have created a unique Smart Rent option. Smart Rent allows you to own your Storage Systems and/or Materials Handling Equipment with 24, fixed, monthly direct debit repayments. Ownership is transferred to you upon the final monthly payment. Now you can own your re-saleable assets with minimal impact on your finances. That's **Smart**.
