

Modular Shelving.

Many goods need to be handled manually as they come in shapes and sizes that cannot be palletised. Modular Shelving is a form of non-palletised storage systems. Smart, versatile and functional Modular Shelving is suitable for most hand-loaded storage applications from single to multi-tier systems.

Non-palletised Storage Systems.

Modular in design and easy to assemble, Modular Shelving has limitless scope for a customised storage facility, complete with a comprehensive range of accessories. It is broadly used for auto parts, pharmaceutical, electronic and archival storage.

A wide variety of configurations can be designed, including **multi-tier** and **mezzanine** floor storage.

It is ideal for convenient storage in:

- Automotive component distribution
- Workshops
- Supermarkets
- Libraries
- Offices
- Self-storage facilities
- Hospitals
- Pharmacies
- Food and equipment storage in hotels and restaurants

Archival Storage.

Elegant, solid and space saving archival storage shelving from ISS ProRack will improve the space design and productivity of any organisation with large document storage needs.

Spare Parts Shelving and Workshop Shelving.

Modular Shelving from ISS ProRack systems have been developed and established with the automotive industry in mind for storage of mechanical and electronic parts.

It offers a full range of accessories to accommodate the versatility of spare parts and components: from small washers to engines, hoses and tyres.
